PROFESSIONAL SUMMARY

Software developer with professional experience building and supporting enterprise web applications, database-driven systems, and customer-facing websites. Experienced in full-stack web development using Python, PHP, JavaScript, SQL Server, MySQL, HTML, and CSS. Developed enterprise financial services applications, accessibility-compliant web solutions, and numerous independent software projects ranging from content management systems to full-stack web applications. Strong background in software troubleshooting, technical support, database development, accessibility, and AI-assisted development workflows.

TECHNICAL SKILLS

LANGUAGES

Python, JavaScript, SQL, PHP, C#, Java, C++, ColdFusion

FRONT-END

HTML5, CSS3, Responsive Design, Bootstrap, jQuery, AJAX

BACK-END

Flask, Node.js, Express, PHP

DATABASES

Microsoft SQL Server, MySQL, MariaDB

TOOLS

Git, GitHub, GitHub Copilot, Visual Studio Code, Visual Studio

DEVELOPMENT PRACTICES

Object-Oriented Programming, REST APIs, Accessibility (WCAG), Agile Development, Software Testing, Debugging, Technical Documentation

PROFESSIONAL EXPERIENCE

ASSOCIATE SOFTWARE DEVELOPER

Broadridge Advisor Solutions | San Diego, CA | 2019–2022

- Developed and maintained enterprise web applications using ColdFusion, SQL Server, HTML, CSS, and JavaScript.
- Participated in requirements analysis, development, testing, deployment, and production support.
- Created SQL queries and stored procedures supporting enterprise applications.
- Developed a bulk-update utility that reduced manual processing effort by more than 50%.
- Investigated and resolved software defects and production issues.
- Updated more than 50 templates to meet WCAG 2.0 AA accessibility standards.
- Collaborated with developers, QA analysts, project managers, and business stakeholders.

TECHNICAL SUPPORT REPRESENTATIVE, TIER 2

Broadridge Advisor Solutions | San Diego, CA | 2016–2018

- Provided technical support for websites, hosting environments, and web-based applications.
- Diagnosed and resolved software, account, and website issues.
- Resolved 6,904 support incidents during a single evaluation period.
- Documented defects and collaborated with development teams on issue resolution.
- Authored technical documentation and knowledge base content.

SELECTED SOFTWARE PROJECTS

STACKNSCROLL.COM

Software Engineering & Technical Content Platform

Technologies: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, SEO, Accessibility

- Designed, developed, and maintain a technology-focused publishing platform focused on software engineering, web development, software architecture, and career development.
- Built using WordPress, PHP, MySQL, HTML, CSS, and JavaScript.
- Manage site architecture, SEO, content strategy, accessibility, performance optimization, and deployment.
- Publish technical articles covering CSS architecture, software design, development practices, and AI-assisted development.

PASSIONATE TEACHING JOURNEY.COM

Educational Content Management Platform

Technologies: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript

- Developed and maintain an education-focused website publishing instructional technology, mathematics education, and teaching resources.
- Implemented content management, SEO optimization, analytics integration, and responsive design.
- Manage website administration, content strategy, and platform maintenance.

JAMISONSTAMPS.COM

Database-Driven E-Commerce and Collection Management Platform

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript

- Designed and developed a website supporting philatelic research, collection management, grading records, and online sales.
- Built database-driven functionality supporting inventory management, cataloging, search capabilities, and content administration.
- Maintained site architecture, content management, and customer-facing functionality.

PASSWORD EXPOSURE CHECKER

Cybersecurity Utility Application

Technologies: Python, PHP, JavaScript, HTML5, CSS3, Security APIs

- Developed a privacy-focused password security tool utilizing the Have I Been Pwned password dataset.
- Implemented k-anonymity password verification to avoid transmitting complete password hashes.
- Combined PHP, Python, and JavaScript to create a secure browser-based user experience.

HACKER NEWS AGGREGATOR

API-Driven News Application

Technologies: JavaScript, HTML5, CSS3, REST APIs, JSON

- Developed a web application that retrieves and displays technology news using external APIs.
- Implemented asynchronous data retrieval, filtering, sorting, and responsive user interfaces.
- Demonstrates API integration, client-side application architecture, and dynamic content rendering.

DND5ETOOLS.COM

Large-Scale JavaScript Utility Platform

Technologies: JavaScript, jQuery, HTML5, CSS3, Responsive Design

- Designed and maintain a collection of browser-based role-playing game utilities and character-generation tools.
- Developed data-driven applications supporting dynamic content generation and user interaction.
- Maintained a long-running public website serving gaming resources and downloadable content.

EDUCATION

MASTER OF SCIENCE, INFORMATION TECHNOLOGY (WEB DESIGN CONCENTRATION) | 2019

Southern New Hampshire University | Distinguished Scholar | GPA: 4.000

GRADUATE CERTIFICATE, FULL STACK+ WEB DEVELOPMENT | 2021

Regis University | GPA: 3.917

BACHELOR OF SCIENCE, COMPUTER SCIENCE | 2015

National University | Magna Cum Laude | GPA: 3.764

PROFESSIONAL CERTIFICATE | 2022

University of California, Davis | GPA: 3.860

PUBLICATIONS AND RECOGNITION

VIRTUAL ROLLER COASTER DESIGN

Published in the Journal of Technology-Integrated Lessons and Teaching (2024). Honorable Mention, JTILT Technology-Rich Lesson Plan Competition.

ADDITIONAL INFORMATION

- Additional Information
- U.S. Citizen
- Veteran, U.S. Army, California Army National Guard, California Air National Guard, and U.S. Air Force Reserve
- Daily user of ChatGPT and GitHub Copilot for software development, debugging, documentation, and research.
